SECTION I - Significant Organizational Activities.

A. Administration/Personnel.

1. During this period there were no changes in the command of II FFORCEV Artillery nor was there a large rotation of assigned personnel. The morale of the unit continues to be outstanding. The following awards were presented to assigned and attached personnel:

a. Bronze Star Medal	4
b. Army Commendation Medal	8
c. Air Medal	5

2. There were no administrative or tactical movements of II FFORCEV Artillery Headquarters during this period.

3. The current organizational structure of II FFORCEV Artillery is at Inclosure 1.

**1
FOR OFFICIAL USE ONLY**

1
SECRET

B. (S) Operations and Intelligence.

1. (C) General.

This headquarters' previous operational report indicated completion of the II FFORCEV Artillery Stationing Plan; however, continuous examination of current and future operational requirements have dictated additional restationing to provide adequate artillery support to US/FWMAF and ARVN Forces. Additional emphasis has also been directed towards assisting and improving the effectiveness of ARVN Artillery.

2. (S) Stationing and Missions of II FFORCEV Artillery Units.

The current base camp positioning of II FFORCEV Artillery units is at Inclosure 2. Heavy artillery coverage within III CTZ is at Inclosure 3. General missions are outlined in Inclosure 4. Specific missions will vary from time to time based on operational requirements.

a. The previous operational report outlined plans for positioning firing batteries of the 7th Bn, 8th Arty at BEN LJC (XS637766), DONG TAM (XS410443) and BEAR CAT (YT169995); however, operational requirements directed deployment of B and C Battery's to positions vicinity BIEN HOA (YT025147). On 14 September 67, Battery B was airlifted to SONG BE (YU138063), in northern PHUOC LONG Province. From this new position artillery support was provided for SF/CIDG camps, RF/PF outposts, and ARVN installations in the northern portion of III CTZ. This positioning will also provide support for US/FWMAF or ARVN Forces during any future operations in northern War Zone D.

b. Battery B, 6th Bn, 27th Arty, which had been attached to III MAF in I CTZ since September 1966, returned to III CTZ on 14 September 1967. After a refitting period at BIEN HOA the battery was flown to SONG BE on 14 October 1967 to replace Battery B, 7th Bn, 8th Arty. This re-positioning lessened the problem of control of both heavy artillery battalions.

c. USARV General Order 5030 dated 2 October 67 attached Btry H (SLT), 29th Arty to the 13th Combat Aviation Battalion located at CAN THO (WS8608) in IV CTZ. This action eliminated administrative and transportation problems which previously existed with the battery attached to the 9th Infantry Division based at BEAR CAT.

d. On 13 October 1967, Battery A, 2d Bn, 32d Arty, located at CU CHI (XT6414), moved to TAY NINH (XT160524). Battery C, 2d Bn, 32d Arty formerly positioned at TAY NINH moved to DAU TIENG (XT496486). These deployments concentrated the firing capabilities of three heavy artillery batteries in the War Zone C area. Most of War Zone C can now be covered with overlapping heavy artillery coverage. The capability to weight any future US/FWMAF operation in War Zone C, while still retaining adequate coverage in the MICHELIN PLANTATION and BOI LOI WOODS illustrates the flexible deployment of heavy artillery.

SECRET

SECRET

e. On 14 October 1967, Headquarters and Headquarters Battery and Service Battery, 7th Bn, 8th Arty moved from BEAR CAT to BIEN HOA. This move co-located the headquarters with two of the firing batteries.

3. (C) Assistance to ARVN.

a. II FFORCEV Artillery continued to expand its program of providing assistance to ARVN Artillery, RF/PF and Special Forces/CIDG. During the reporting period, artillery of II FFORCEV fired 16,014 missions expending 81,044 rounds in support of ARVN ground forces, Special Forces/CIDG, and RF/PF outposts.

b. On 21 September, II FFORCEV Arty conducted a joint ARVN/US Artillery Seminar for senior artillery officers and artillery commanders. ARVN officers in attendance at the meeting included the Chief of ARVN Artillery, the Commandant of the ARVN Artillery School, the ARVN Corps Artillery Commanders of III and IV Corps, and the Division Artillery Commanders of the 5th, 18th and 25th ARVN Divisions. The US/PWMAF attendees included the 1st, 9th and 25th Division Artillery Commanders, the Commanders of the 23d and 54th Artillery Groups, Battalion Commanders of 5th Bn (AW)(SP), 2d Arty, 2d Bn, 40th Arty, and a representative from the 4th Field Regiment, 1st Australian Task Force. Briefings were presented on: Functions of the ARVN Artillery Command; Current Employment of ARVN Artillery; US/PWMAF Artillery Organization and Deployment; Measures to Prevent Artillery Accidents and Incidents; US Assistance to ARVN Artillery Refresher Training; and Defense Against Rocket/Mortar Attacks. The results of the seminar were encouraging and future seminars are planned.

c. II FFORCEV Arty units continued the program of assisting in development of defensive artillery support plans for RF/PF outposts. This program consists of presenting instruction on conduct and adjustment of artillery fire; use of direction locating devices, and firing in defensive targets where possible.

d. Artillery officers visited each Special Forces/CIDG Camp in III CTZ and presented instruction on artillery adjustment procedures, assisted camp commanders in planning defensive fires and insured that communications were established with all friendly artillery in range of the camp.

4. (C) Programs to Increase the Accuracy of Artillery.

a. One section of the 8th Bn, 25th Arty (TAB) located at LONG BINH (YTO53112) deployed with Battery B, 7th Bn, 8th Arty to SONG BE (see paragraph 2a) to provide additional metro coverage for this area. To provide metro data for the central region of III CTZ, the 7th Bn, 8th Arty's metro section at BIEN HOA was moved to BIEN HOA and co-located with its headquarters battery.

b. Calibration of Artillery Pieces.

Calibration was conducted for 344 of 428 US/PWMAF, and four

³
SECRET

~~CONFIDENTIAL~~

(4) ARVN artillery pieces during the reporting period. Pull-over gauge readings were made on 147 US/PVMAF tubes.

c. Survey.

The program to provide position area survey to all ARVN artillery positions has been completed. Emphasis is now being placed on extending survey to all RF/PF outposts. Priority will be given to outposts located in close proximity to heavily populated areas and to outposts supporting Revolutionary Development Teams. Defensive targets have been surveyed at eighteen (18) outposts during the reporting period. Other survey operations were completed to establish survey control for firing batteries and radars at BIEN HOA AFB, watch towers and radars at TAN SON NHUT AFB (XS8198), and declination stations at BIEN HOA and TAN SON NHUT. The updated III CTZ Trig Supplement was finalized, published, and distributed during October. The current status of survey control in III CTZ is shown at Inclosure 6.

5. (C) Harassment and Interdiction (H&I) Program.

II FFORCEV Artillery has established a special H&I program emphasizing target planning in and around areas where enemy contact has occurred. Timely interdiction and neutralization is the main objective of this specialized program. An additional improvement in the regular H&I program has been the increased correlation of target data through intelligence inputs from G-2, II FFORCEV. These include imagery interpretation, spot intelligence reports and Combined Intelligence Center Vietnam reports facilitating detailed evaluation and analysis of target data, the results of which are used in targeting VC main forces and local forces throughout III CTZ.

6. (C) Aircraft for Artillery Units.

a. Insufficient aircraft and aviator support continues to have an adverse effect on artillery operations. The situation is aggravated by the movement of the heavy battery to SONG BE which expanded the required Visual Reconnaissance coverage by approximately 2,200 square kilometers.

b. The 54th Artillery Group has no aviators or aircraft assigned. The 23d Artillery Group has eleven helicopters and seven (7) O-1 aircraft. This Group presently has nine (9) pilots available; however, within the next five (5) months, four (4) of these pilots will rotate.

c. Current Department of the Army policy is that neither aircraft nor aviators can be requisitioned specifically for artillery and other combat support type units. Therefore, no replacements are programmed at this time. Current USARV guidance indicates that aviation support will be provided from II FFORCEV assets.

CONFIDENTIAL

10

7. (C) Field Artillery Digital Automatic Computer.

The issuance of FADAC was continued to include the 9th US Infantry Division Artillery, the direct support battalion (2d Battalion, 40th Artillery) of the 199th Light Infantry Brigade, all battalions of the 54th Artillery Group, and the Howitzer Batteries of the 11th Armored Cavalry Regiment. An orientation in operation and maintenance was conducted by the FADAC Orientation Team for these units.

8. (C) TOE for Artillery.

a. During August and September 1967, the TOE's for all division artillery and Force Artillery battalions were reviewed and standardized. The objective was to configure the battalions to meet Vietnam requirements. The significant changes included augmentation of Battalion Fire Direction Centers and all battery Fire Direction Centers, provided organic metro capability to medium and heavy battalions, and added a two helicopter aviation section to each battalion.

b. The TOE of the Artillery Groups was reviewed and standardized with similar objectives as described in paragraph a, above. The primary changes were: additional personnel to staff Air Warning Control Centers, increase in liaison capabilities, and added aviation support to the Group Headquarters.

CONFIDENTIAL⁵

CONFIDENTIAL

SECTION II, PART 1 - OBSERVATIONS (Lessons Learned).

1. (U) Personnel: None.

2. (C) Operations:

FIRING PROCEDURES

Item: Simplification of Procedures for Clearing Fires.

Discussion: Prior to firing artillery or planning air strikes against a target, both RVN political and US/FWMAF clearances are required. If the commander obtains civil clearance in advance by getting an approved Specified Strike Zone in conjunction with his AO/TAOR, he can authorize all clearances to fire and has the flexibility to immediately engage targets of opportunity that are located in these areas.

Observation: Obtaining a Specified Strike Zone(s) in conjunction with a TAOR or AO can expedite fire support reaction times.

3. (U) Training and Organization: None.

4. (C) Intelligence:

COUNTER MORTAR RADAR

Item: Deployment of Counter Mortar Radars.

Discussion: Additional AN/MPQ-4A Radars arrived in country in September 1967. Six were allocated for employment in the III CTZ. These radars were stationed at TAM SON NHUT, BIEN HOA, PHU LOI and NHA BE in accordance with established priorities to provide a more nearly optimum defense for these installations. These radars were received minus the power units and Basic Issue Line Items (BILL). A subsequent proposal to deploy these radars to I CTZ has required the requisitioning of associated equipment since many of the items were not in country. These items are considered essential when new equipment is to be deployed in the field.

Observation: Procedures should be established in CONUS to insure that basic issue line items are available before a major piece of equipment is issued to the field.

5. (U) Logistics: None.

6. (U) Other: None.

CONFIDENTIAL

CONFIDENTIAL

12

SECTION II, PART 2 - RECOMMENDATIONS.

1. (U) Personnel: None.

2. (U) Operations:

Item: Meteorological Equipment.

Discussion: Maintaining the operational readiness of artillery meteorological sections within II FFORCEV is difficult. This results from the age of RAVIN Sets, AN/GND-1 (A or B), the shortage of spare parts and the marginal maintenance support provided by direct and general support units. The maintenance of float equipment by the II FFORCEV Artillery Meteorological Quality Control Team would reduce downtime by providing immediate replacement equipment to units without the loss of time at direct support and general support units. Presently, this Meteorological Quality Control Team is not authorized float equipment; however, a letter was submitted to 1st Logistical Command in January 1967 requesting approval of this action. No action has been taken to date.

Recommendation: That the II FFORCEV Meteorological Quality Control Team be authorized to stock specified meteorological equipment as maintenance float items.

3. (U) Training and Organization: None.

4. (U) Intelligence: None.

5. (C) Logistics:

Item: Repair Parts for Deadlined Artillery Weapons.

Discussion: The responsiveness of the current system in effect for obtaining repair parts for deadlined artillery weapons is causing extended periods of downtime. Current stock records for repair parts at in country depots do not reflect accurate locations or quantities. In practice it has been found that information on these stock records does not correspond to the actual status of available repair parts.

Recommendation: That maintenance support echelons establish procedures expediting flow of spare parts to deadlined equipment of supported units.

6. (U) Other: None.

31 October 1967 (RCS/CSFOR-65) (UIC-WDFU TO)

DA HQ II FFORCEV, APO San Francisco 96266 21 NOV 1967

THRU: Commanding General, USARV, ATTN: AVHGC-DH, APO 96370

Commander-In-Chief, US Army Pacific ATTN: GPOP-OT, APO 96556

TO: Assistant Chief of Staff for Force Development, Department of the
Army, Washington, D.C. 20310

1. Subject report is forwarded.

2. This command has reviewed the attached report and concurs with
the comments and recommendations with the following exceptions:

Section I, p(4), par(6), Aircraft for Artillery Units. Action
has been taken by HQ II FFORCEV to provide II FFORCEV Arty with additional
aviators. Pending final action on MTOE, these aviators will be furnished
on TDY from within 12th Combat Aviation Group assets. A sufficient number
will be provided to maintain II FFORCEV Arty at 90% of requested MTOE
strength. This is in consonance with present DA policy that imposes a
90% aviator manning level on all units authorized aviation.

Section II, p(7), par(2a), Operations. Concur in the recommenda-
tion that specified meteorological equipment be made available for main-
tenance float, but maintenance floats should be maintained by the DS
unit.

Section II, p(7), par(5), New procedures for reporting deadlined
Artillery have recently been put into effect. This should expedite the
flow of spare parts for weapons.

SUBJECT: Operational Report-Lessons Learned for Quarterly Period Ending
31 October 1967 (RCS CSPOR-65) (UIC W-DHI-HS) (U)

HEADQUARTERS, UNITED STATES ARMY VIETNAM, APO San Francisco 96375 12 DEC 1967

TO: Commander in Chief, United States Army, Pacific, ATTN: GPOP-DT,
APO 96558

1. This headquarters has reviewed the Operational Report-Lessons Learned for the quarterly period ending 31 October 1967 from Headquarters, II Field Force Vietnam Artillery (DHIH) as indorsed.

2. Pertinent comments follow:

a. Reference item concerning counter mortar radar, page 6, paragraph 4: Concur. A number of sets were shipped to RVN for use in cyclic overhaul exchange and were accepted less BILL (Basic Inventory List Items) for that reason. Because of tactical requirements these sets were issued to units, but this should not occur in the future.

b. Reference item concerning meteorological equipment, page 7, paragraph 2: Concur with the suggestion to establish a float at direct support level. Nonconcur in establishing one at organizational level. 1st Logistical Command is being advised to establish the float.

c. Reference item concerning repair parts for deadlined artillery weapons, page 7, paragraph 5: Concur with comments at 1st Indorsement, paragraph 2. This new procedure for reporting deadlined artillery will also permit placing reball requisitions earlier and at a lower level. As the maintenance units purify their records the existing system will provide adequate support.

3. A copy of this indorsement will be furnished to the reporting unit through channels.
